

fibraplac | RAW

Is our base in MDF board (for its acronym in english Medium Density Fiberboard), the boards FIBRAPLAC RAW ® are elaborate throught a composition of woods select that provide the optimum density required by international standards UNE-EN 622-5:2010.

CHARACTERISTICS

FIBRAPLAC RAW ® it is characterized by it's smoth and homogeneous composition, as well as it's uniform tonality that allows it to receive all kinds of finishing. It is of easy machinability, supports the weiht very well and has better resistance to combustion than solid wood. Due to it's excellent internal compaction and optimum screw grip, it is an alternative to the use of solid wood.

- 1 Defines the bonding strenght of the fibers inside the board.
- 2 It is defined by the allowable load capacity that a board supports, considering supports at both ends of it.

This product generates waste cataloged as NOT DANGEROUS

USES AND APPLICATIONS

- Furniture of domestic use
- Handmade toys
- Work stations
- Shelves and exhibitors
- Doors and panels
- Decorative coatings
